Our Products:

Flutter App Development:

Description:

Aldaalah is a comprehensive Islamic utility app designed to support Muslims in their daily worship and spiritual travels. Featuring a refined green and gold aesthetic, the app provides essential tools for prayer, supplication, and pilgrimage guidance.

Key Features:

- **Guided Pilgrimage**
- **Extensive Dua Library**
- **Real-Time Prayer Tools**
- **Daily Spiritual Rituals**
- **Community Connection**

Our Products:

Flutter App Development:

Description:

A professionally designed mobile application focused on secure and seamless user authentication. The app delivers modern user experience with multiple login options, ensuring both security and convenience for users across platforms.

Key Features

- Secure user login and registration system
- Email / username and password authentication
- Social media login (Facebook, Apple, Google)
- Forgot password and account recovery functionality
- Clean, modern, and intuitive user interface
- Smooth navigation with responsive design
- Cross-platform compatibility (Android & iOS)

Technologies Used

- Flutter / React Native
- Firebase Authentication
- REST APIs
- UI/UX Design Principles

Our Products:

Website Development:

Description:

A sophisticated lifestyle blog and directory platform designed to bridge the gap between editorial content and e-commerce. This design focuses on high-impact visual storytelling and organized information architecture, making it easy for users to transition from reading fashion guides to browsing product directories.

Key Features:

- Grid-Based Editorial Layout
- Comprehensive Brand Directory
- Sales Conversion Pop-ups
- Modern Aesthetic

Technologies Involved

- **Next.js / React.js:** For building a fast, SEO-optimized, and highly responsive frontend interface.
- **Tailwind CSS / Styled Components:** To implement the modern grid-based layout and maintain a sleek, high-fashion aesthetic.
- **Headless CMS (Sanity / Contentful):** To manage editorial content and the brand directory independently from the commerce engine.
- **Shopify Storefront API / MedusaJS:** To facilitate a seamless "Headless" e-commerce experience for product browsing and checkout.

Our Products:

Website Development:

Description:

A streamlined and responsive e-commerce application designed for a premium shopping experience. The platform features a clean, user-centric interface that handles the full shopping journey, from product discovery via a high-impact hero section to secure user registration and seamless checkout.

Key Features

- Dynamic Hero Interface
- User Authentication System
- Product Grid & Management
- Integrated Checkout Flow
- Professional Branding

Technologies Involved

- **HTML5 & CSS3:** For structuring and styling a modern, responsive interface that ensures a seamless experience across all devices.
- **JavaScript (ES6+):** To handle dynamic frontend interactions, such as the hero interface and real-time product updates.
- **PHP:** Often used as the server-side language for managing backend logic, user authentication systems, and database communication.
- **MySQL:** For secure storage and management of user data, product inventory, and order history.
- **RESTful APIs:** For integrating various components of the shopping journey, from product discovery to secure checkout flows.

Our Products:

Business Data Analyst:

Business Performance Dashboard:

Designed interactive Power BI/Tableau dashboards to track KPIs, analyzed datasets with Excel & SQL, and delivered insights that helped clients make data-driven decisions.

Sales Analysis Dashboard:

Conducted sales trend analysis using Excel and SQL, created visual dashboards in Power BI, and identified growth opportunities that supported client revenue planning.

Project Schedule & Milestone Tracking Dashboard:

Built a project management dashboard with Gantt-style timelines, milestone tracking, and resource allocation views. Enabled real-time progress monitoring, workload balancing, and bottleneck identification using Power BI and DAX.

Higher Education Admissions Dashboard: Designed a Tableau dashboard to analyze admissions data across programs and countries. Visualized applicant trends, demographics, acceptance rates, and program demand to support strategic decisions in higher education.

Our Products:

Digital Marketing

Description:

A comprehensive and responsive e-commerce web application designed for a premium shopping experience. This project showcases a clean, user-centric interface that manages the entire customer journey from high-impact brand discovery on the landing page to secure user registration and product selection.

Key Features

- **Dynamic Hero Interface:** A high-resolution promotional banner featuring a centered call-to-action (CTA) button to drive immediate user engagement.
- **User Authentication System:** A dedicated "Sign Up" page with a clean, centered form layout for capturing essential user data like name, email, and contact details.
- **Responsive Product Catalog:** A professional grid-based product display featuring high-quality imagery, brand names (Raymond, Charles, HXR, PINK), and localized pricing.
- **Direct Purchase Flow:** Individual "Buy Now" triggers integrated into every product card to facilitate a frictionless shopping experience.
- **Professional Footer Integration:** A minimalist dark footer containing persistent brand copyright information and developer credits for a polished, finished look.

Our Products:

Digital Marketing

Description:

A comprehensive digital marketing performance report that tracks the effectiveness of Facebook ad campaigns. This project focuses on analyzing core metrics such as total ad spend, audience reach, and the cost per incoming message to evaluate how efficiently a marketing budget is converted into active customer leads and business visibility.

Key Features

- **Ad Spend & Budget Tracking:** Real-time monitoring of total expenditure to ensure campaigns stay within set financial limits.
- **Messaging & Conversion Metrics:** Detailed reporting on "Cost Per Result" to show the average price paid for each incoming customer message or inquiry.
- **Reach and Visibility Analysis:** Tracking the total number of unique people exposed to the services to measure brand awareness impact.
- **Impression & Engagement Overview:** Differentiating between total ad views and active user interactions like likes, comments, and shares.
- **Conversion Funnel Visualization:** Mapping the customer journey from the initial ad view to the final action, such as sending a message.
- **Audience Targeting Insights:** Breakdown of campaign performance by demographic data, including age, gender, and geographic location, to refine targeting strategies.

Our Products:

Digital Marketing

Project:

Executed a data-driven Facebook Marketing campaign for a healthcare-focused client, successfully generating over **200 direct messaging inquiries**. By maintaining a low **Cost Per Messaging Conversation** ranging from **PKR 40 to PKR 57**. Optimized the budget to ensure high-intent lead generation and maximized ROI.

Campaign Breakdown & Achievements:

- **New Product Launch (Apparel):** Successfully drove the highest volume of engagement with **182 messaging conversations**, establishing a strong market entry for a new product line.
- **Flash Deal Performance:** Achieved a massive reach of **67,250 unique users** with a highly efficient cost of **PKR 10.90 per 1,000 people reached**, maximizing brand exposure during a limited-time offer.
- **Seasonal Sales (Q3):** Generated **95 high-intent messaging leads**, focusing on converting interest into direct customer inquiries during peak shopping periods.
- **Brand Awareness:** Maintained a dedicated "Winter Awareness" campaign to ensure top-of-mind recall, resulting in **35 targeted interactions** at a low maintenance cost.

DEPARTMENT OF ECONOMICS

ADMISSION OPEN

Women University Mardan Bakhshali Campus

Economics is the science of decision making. As individuals, communities, companies and governments, we face choices every day, weighing up costs and benefits of our decisions. With the ongoing drive of globalization, economics remains a key element. As a result, the demand for fresh economics graduates is on the rise. This is because these students will be well equipped with various tools and techniques to solve complex problems on any scale.

Why Choose Us?

The degrees in Economics are professional degrees that will prepare students for careers in the private sector as:

- Economic analysts in business
- Consultancy firms
- Financial institutions and
- Applied research firms.

They may also find jobs in

- International organizations
- Government and
- Non-profit organizations (non-government organization)
- Universities and
- Other teaching jobs
